What is Monster Phonics?

The 26 letters of the alphabet and combinations of these letters make 44 speech sounds in English. The 44 sounds (phonemes) are spelt by 144 different letter combinations (graphemes). For example, the sound A is spelt several different ways, including ay (play) and ai (train).

Traditional ways of learning to spell can be time-consuming and for some children they are ineffective. Monster Phonics teaches children to read by enabling them to identify the individual graphemes (letter combinations) ad blend the sounds (phonemes) together to read the word.

To support this process, Monster Phonics uses the 10 monsters to categorise all sounds into 10 simple areas. Furthermore, each monster has a different colour and that colour represents that way of spelling the sound.

Why does it improve learning?

The child learns through the assignment of colour and the linkage of the sound, as well as seeing the colour, creating more ways of remembering the spelling.

Your teacher will be using games, songs and activities that continuously reflect this way of learning, so that structure is constantly seen, heard and experienced by your child. This consistency is critical in ensuring that a complicated language is learnt in the most simplistic way. Therefore it is essential that you use Monster Phonics.
